FABRISPAN®

CUSTOM ART ON FABRICS
AND 100% WOOL FABRIFELT™

ADD AN ARTISTIC TOUCH

A #visuallysound interior is achievable with FabriTRAK Systems variety of FabriSPAN® fabrics and FabriFELT™. Whether adding dimension with a repeated pattern, unique art, photography, custom color, or texture with a 100% natural wool felt, FabriTRAK offers designers an unlimited array of materials to create a custom color interior.

SOUND SOLUTIONS FOR EVERY INTERIOR

FabriTRAK offers wide width and ultra-wide width fabrics and felt textiles that have been rigorously tested for both fire and acoustic tests. Many of the FabriSPAN® fabrics and FabriFELT™ are DECLARE certified and qualify for LEED v4. All of the decorative fabrics and felt work with the FabriTRAK® and GeoTRAK® Systems for walls and ceilings. FabriFELT™ is also used to cover Autem™ Baffles and Clouds.

For further information about our selection of FabriSPAN® fabrics and FabriFELT™ standard colors and thicknesses, fire and acoustic test reports, please visit our website or contact your local dealer.

CUSTOM INTERIOR FINISHES

Designers appreciate the diversity of FabriPRINT™ and FabriFELT™ to create custom interiors by adding visual and textural finishes. All fabrics may be easily swapped out for seasonal or campaign images without damaging walls, ceilings, or trak profiles. The use of these materials allows for complete design flexibility while offering sustainable options to designers.

Many FabriSPAN® fabrics and all of the FabriFELT™ products offer health and wellness features such as resistance to mold and / or bacteria, cleanability, moisture repellant, installation without the use of special safety equipment.

HOW ART IS INSTALLED

Functional | Aesthetic | Changeable

When adding FabriSPAN® or FabriFELT™ to an interior space, FabriTRAK® or PVC-free, eco-friendly GeoTRAK® wall and / or ceiling trak is installed to the substrate and infill is added to enhance the acoustics.

The textile is then added by tucking and locking it into the trak system, resulting in an interior finish that combines custom high-end design with acoustics.

The beautiful look of an acoustic art installation does not have to be permanent. The FabriTRAK® and GeoTRAK® Systems are designed to easily change the textile as desired.

HOW FABRITRAK® PANELS WORK

FabriSPAN® Printed Fabric

FABRIPRINT™

THE POWER OF DIGITAL ART
THE STRENGTH OF ACOUSTICS

EXCEPTIONAL DESIGN FOR EVERY STYLE

FabriPRINT™ by FabriTRAK Systems is an innovative product that effectively combines acoustic performance and artistic imagery, transforming an acoustic wall or ceiling into a work of art, and art works into a beautiful sound solution. FabriSPAN® fabric can be dyed (up to 10' wide) to any Pantone, paintchip or custom color. There is no limit to a color palette in the system.

FabriPRINT™ is available in both FabriART™ and FabriPATTERN™ solutions, offering total design flexibility in any interior space, from edu-

MAXIMIZE THE SOUND POTENTIAL AND ARTISTIC CREATIVITY

Art can stimulate creativity, engage the community, encourage action and enhance the atmosphere. Good design communicates a sense of space, how it looks and how it sounds. Whether digital graffiti art on fabric or a company logo, FabriPRINT™ makes the space sound like you. The seamless look of our acoustic art allows the perfect blend of creativity and purpose to any interior.

FabriART™ and FabriPATTERN™ delineate space, highlight public and private areas in subtle and attractive ways, and incorporate a company, school or individuals sense of style to any space

FABRIART™

SOUND PERFORMANCE NEVER LOOKED SO GOOD

COMBINING ART AND FUNCTION

Interior designers seek to evoke a sense of uniqueness to spaces while bringing a specific look, such as fine art, a corporate or team logo, digital photography or graffiti, or bespoke art designs. FabriART™ is available on a range of wide width (10') and ultra-wide width (16') fabrics and can be used with the FabriTRAK® wall and ceiling trak system or the environmentally-friendly non-PVC GeoTRAK® system.

CREATE A CUSTOM LOOK WITH SUPERIOR SOUND ABSORPTION

FabriART™ transforms not only the perception of a space, but the sound within the space. The fabric printing does not deter from the acoustical qualities of the trak system. When the printed fabric is installed with the infill and trak, the noise reduction and sound absorption work as effectively as any non-printed fabric.

The art sounds as good as it looks.

COMMUNICATE THE SPACE THROUGH ART

FabriART™ allows the **artist** to translate any creative image into an acoustical art panel for an interior space.

FabriART™ enables the **interior designer** to achieve maximum creativity in creating a sense of space and incorporate images into interiors while considering sound and noise control.

FabriART™ provides the **client** a sound space that shows off their style, whether incorporating a company logo, commissioned art piece or personal photography on a wall or ceiling.

- ✓ Cultural Spaces
- ✓ Houses of Worship

FABRIPATTERN™

SUPERB ACOUSTICS, CUSTOM DESIGN

ATTRACTIVE SOUND MANAGEMENT

FabriPATTERN™ achieves both style and beauty with a keen sensitivity to how a space should sound - even in the most challenging environments.

Create your own individual look

Patterns give space not only a sense of consistency but also a sense of unity. Interior Designers will use a repeating pattern to create a cohesive feel on walls and ceilings to define a space. FabriPATTERN™ helps to delineate specific spaces, such as corporate work zones, dining areas in restaurants, or meeting places in public areas.

Patterns can be as interesting or as subtle as the space calls for. Pattern changes on a wall or ceiling fabric can help create a calming atmosphere as well. FabriPATTERN™ may also be used to repeat a corporate or team logo in a large venue, can become an artistic feature in a retail space, or stand out as a feature wall in a residence.

ACOUSTIC SOLUTIONS WITHOUT COMPROMISING DESIGN

When using FabriPATTERN™ on a FabriTRAK® or GeoTRAK® system, incorporating both trak and infill, an artistic statement is made while meeting the highest ratings of acoustics.

ENHANCE THE INTERIOR SPACE

FabriPATTERN™ works on a range of fabrics such as FabriSPAN®'s wide width (10') and ultra-wide width (16') fabrics. As with FabriART™, the printing on the fabric for FabriPATTERN™ does not deter from the acoustic ratings.

#CUSTOMISSTANDARD

FabriTRAK Systems Art Department works closely with interior designers and architects to ensure artwork is printed accurately to fabric. Based on each fabric's unique properties, we can advise which material will suit colors, patterns and art best, as well as assist in art file preparation for print.

Our goal is to ensure each interior space achieves the ultimate #visuallysound solution is achieved in each interior space.

FABRIFELT™

CREATE DISTINCTIVE SPACES

NATURAL | SOUND ABSORBING | DECORATIVE

FabriFELT™ by FabriTRAK Systems is 100% pure wool, eco-friendly and sustainable material that is DECLARE certified and suitable for LEED v4 interiors.

FabriFELT™ is suitable for insertion in the FabriTRAK® and GeoTRAK® Systems and as a standalone product, as seen on the Autem™ Baffles and Clouds. FabriFELT™ is all natural and is available in 23 standard heathered and solid colors. The felt is 100% recyclable and made without the use of harmful chemicals. FabriFELT™ is available in 1mm standard thickness with other thicknesses available, and is 72" wide.

100% TIMELESS

Felt is the worlds oldest known textile, and one of today's top interior trends. The material is versatile and durable while providing a natural warmth and excellent sound absorption. FabriFELT™ is found in a variety of interiors, especially in high traffic spaces. Designers understand that FabriFELT™ is made from natural fibers, and that color variations may occur.
